# SAFETY DATA SHEET

### Special Brush Type Cement

### Section 1. Identification

| GHS product identifier                                     | : Special Brush Type Cement  |
|--|--|
| Other means of identification                              | : Not available.   |
| Product code   | : 94-063, 96-554, 96-556, 96-558   |
| Product use  | : Adhesive.  |
| Supplier's details   | : Patch Rubber Company<br>100 Patch Rubber Road<br>Weldon, NC 27890 USA<br>T: (252) 536-2574                         |
| e-mail address of person responsible for this SDS          | : roa-coa@patchrubber.com  |
| Emergency telephone<br>number (with hours of<br>operation) | : CHEMTREC: United States and Canada :1-800-424-9300<br>CHEMTREC: Outside United States and Canada: 001-703-527-3887 |

### Section 2. Hazards identification

| OSHA/HCS status                            | : This material is considered hazardous by the OSHA Hazard Communication Standard 2012 (29 CFR 1910.1200).   |
|--|--|
| Classification of the substance or mixture | : FLAMMABLE LIQUIDS - Category 2<br>SKIN IRRITATION - Category 2<br>EYE IRRITATION - Category 2A<br>SKIN SENSITIZATION - Category 1<br>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) -<br>Category 3<br>Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 23.8% |
| GHS label elements                         |  |
| Hazard pictograms                          |  |
| Signal word                                | : Danger   |
| Hazard statements                          | <ul> <li>Highly flammable liquid and vapor.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>Causes serious eye irritation.<br/>May cause drowsiness or dizziness.</li> </ul>  |
| Precautionary statements                   |  |
| Prevention                                 | : Wear protective gloves. Wear protective clothing. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No   |

away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use nonsparking tools. Take action to prevent static discharges. Use only outdoors or in a wellventilated area. Avoid breathing dust or mist. Wash hands thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.

Date of previous issue

| Response                            | : Call a POISON CENTER or doctor if you feel unwell. IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. |
|-------------------------------------|---|
| Storage                             | : Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.  |
| Disposal                            | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazards not otherwise<br>classified | : None known.   |

### Section 3. Composition/information on ingredients

| Substance/mixture             | : Mixture                |
|-------------------------------|--------------------------|
| Other means of identification | : Not available.         |
| Product code                  | : 16-349, 16-350, 16-351 |

| Ingredient name  | %               | CAS number |
|--|-----------------|------------|
| Naphtha (petroleum), hydrotreated light                              | 60 - 100        | 64742-49-0 |
| heptane  | 25.185 - 37.777 | 142-82-5   |
| 3-Methylhexane   | 0 - 25.185      | 589-34-4   |
| Methylcyclohexane  | 0 - 16.79       | 108-87-2   |
| 2-Methylhexane   | 0 - 12.593      | 591-76-4   |
| carbon black, respirable other than powder                           | 1 - 5           | 1333-86-4  |
| 2,3-dimethylpentane  | 0 - 4.198       | 565-59-3   |
| Zinc oxide   | 0.1 - 1         | 1314-13-2  |
| Phenol, 4-(1,1-dimethylethyl)-, polymer with sulfur chloride (S2Cl2) | 0.1 - 1         | 60303-68-6 |
| Benzothiazole, 2,2'-dithiobis-                                       | >0.057          | 120-78-5   |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Description of necessary f     | irst a | id measures  |  |   |   |   |                            |
|--------------------------------|--------|--|--|---|---|---|----------------------------|
| Eye contact                    | :      | Immediately eyelids. Che minutes. Ge   | flush eyes with plenty o<br>eck for and remove any<br>et medical attention.  | f water, occasionally li<br>contact lenses. # Section 4. First aid measures

|              | airway. Loosen tight clothing such as a collar, tie, belt or waistband.  |
|--------------|--|
| Skin contact | : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| Ingestion    | : Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention. If necessary, call a poison center or physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

| Most important symptoms/    | effects, acute and delayed  |
|-----------------------------|---|
| Potential acute health effe | <u>cts</u>  |
| Eye contact                 | : Causes serious eye irritation.  |
| Inhalation                  | <ul> <li>Can cause central nervous system (CNS) depression. May cause drowsiness or<br/>dizziness.</li> </ul>   |
| Skin contact                | : Causes skin irritation. May cause an allergic skin reaction.  |
| Ingestion                   | : Can cause central nervous system (CNS) depression. May be irritating to mouth, throat and stomach.  |
| Over-exposure signs/sym     | <u>otoms</u>  |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                  | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness   |
| Skin contact                | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                   | : No specific data.   |
| Indication of immediate me  | dical attention and special treatment needed. if necessary  |
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled. high concentrations: heartbeat irregularity<br/>(arrhythmia)</li> </ul>  |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Flammable or combustible, may be ignited by heat, sparks or flames. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. Vapors may form explosive mixtures with air. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. |
| Hazardous thermal<br>decomposition products    | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides<br>halogenated compounds<br>metal oxide/oxides<br>Hydrocarbon.  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. Dike area of fire to prevent runoff.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

### Section 6. Accidental release measures

| Personal precautions, protect  | tiv | e equipment and emergency procedures  |
|--------------------------------|-----|---|
| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Stay<br>upwind/keep distance from source. Provide adequate ventilation. Wear appropriate<br>respirator when ventilation is inadequate. Put on appropriate personal protective<br>equipment. |
| For emergency responders       | :   | If specialized clothing is required to deal with the spillage, take note of any information in<br>Section 8 on suitable and unsuitable materials.<br>See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to<br>the environment if released in large quantities.   |

Methods and materials for containment and cleaning up

Small spill: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and<br/>explosion-proof equipment. Ensure that the equipment is adequately grounded. Absorb<br/>with an inert material and place in an appropriate waste disposal container. Dispose of<br/>via a licensed waste disposal contractor.

# Section 6. Accidental release measures

| : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Ensure that the equipment is adequately grounded. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. For large spills, dike spilled material or otherwise contain it to ensure runoff |
|---|
| does not reach a waterway.  |
|   |

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general<br>occupational hygiene                          | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | Store in accordance with local regulations. Store in a segregated and approved area.<br>Store in original container protected from direct sunlight in a dry, cool and well-ventilated<br>area, away from incompatible materials (see Section 10) and food and drink. Store<br>locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not store in<br>unlabeled containers. Use appropriate containment to avoid environmental<br>contamination.   |

# Section 8. Exposure controls/personal protection

#### Control parameters

#### **Occupational exposure limits**

| Ingredient name                |             |                        | Exposure limits  | 5  |      |

| Appropriate engineering controls | :    | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
|----------------------------------|------|---|
| Environmental exposure controls  | :    | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measu      | ires |   |
| Hygiene measures                 | :    | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |
| Eye/face protection              | :    | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                  |      |   |

| _                      |  |
|------------------------|--|
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. Ensure an MSHA/NIOSH-approved respirator or equivalent is used (applicable in the United States).  |

## Section 9. Physical and chemical properties

| Appearance                                   |                              |
|--|------------------------------|
| Physical state                               | : Liquid.                    |
| Color  | : Black.                     |
| Odor   | : Hydrocarbon.               |
| Odor threshold                               | : Not available.             |
| рН   | Not available.               |
| Melting point                                | : Not available.             |
| Boiling point                                | : 93.3°C (199.9°F)           |
| Flash point                                  | : Closed cup: -9.44°C (15°F) |
| Evaporation rate                             | : 4.2 (butyl acetate = 1)    |
| Flammability (solid, gas)                    | : Not available.             |
| Lower and upper explosive (flammable) limits | : Lower: 1.1%<br>Upper: 6.7% |
| Vapor pressure                               | :                            |
| Vapor density                                | : Not available.             |
| Relative density                             | : 0.74 [Water = 1]           |
| Solubility                                   | : Not available.             |
| Solubility in water                          | : Not available.             |
| Partition coefficient: n-<br>octanol/water   | : Not available.             |
| Auto-ignition temperature                    | : 203.8889°C (399°F)         |
| Decomposition temperature                    | : Not available.             |
| Viscosity                                    | : Not available.             |
| Aerosol product                              |                              |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerization will not occur.    |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials: oxidizing materials  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.  |

### Section 11. Toxicological information

#### Information on toxicological effects

| <u>Acute toxicity</u>                         |                       |         |              |          |  |  |  |
|---|-----------------------|---------|--------------|----------|--|--|--|

## Section 11. Toxicological information

|                            | 5                    |        |   |                            |   |
|----------------------------|----------------------|--------|---|----------------------------|---|
| Zinc oxide                 | Eyes - Mild irritant | Rabbit | - | 24 hours 500<br>milligrams | - |
|                            | Skin - Mild irritant | Rabbit | - | 24 hours 500<br>milligrams | - |
| O a maluration /Oursemanne |                      |        |   |                            |   |

#### Conclusion/Summary Skin

: Causes skin irritation.

: Causes serious eye irritation.

#### **Sensitization**

Eyes

| Product/ingredient name        | Route of<br>exposure | Species | Result      |
|--------------------------------|----------------------|---------|-------------|
| Benzothiazole, 2,2'-dithiobis- | skin                 | Human   | Sensitizing |

| Conclusion/Summary    |   |
|-----------------------|---|
| Skin                  | : May cause an allergic skin reaction.  |
| <u>Mutagenicity</u>   |   |
| Conclusion/Summary    | : Not available.  |
| Carcinogenicity       |   |
| Conclusion/Summary    | : Carbon black is classified by the IARC as a Group 2B carcinogen (possibly carcinogenic to humans). Carbon black is inextricably bound in this mixture and therefore does not present a carcinogenic risk. |
| <b>Classification</b> |   |

# Product/ingredient name OSHA IARC NTP carbon black, respirable other than powder 2B

#### Reproductive toxicity

**Conclusion/Summary** : Not available.

#### **Teratogenicity**

**Conclusion/Summary** : Not available.

#### Specific target organ toxicity (single exposure)

| Name                                    | Category   | Route of exposure | Target organs    |
|---|------------|-------------------|------------------|
| Naphtha (petroleum), hydrotreated light | Category 3 | Not applicable.   | Narcotic effects |
| heptane                                 | Category 3 | Not applicable.   | Narcotic effects |
| 3-Methylhexane                          | Category 3 | Not applicable.   | Narcotic effects |
| Methylcyclohexane                       | Category 3 | Not applicable.   | Narcotic effects |
| 2-Methylhexane                          | Category 3 | Not applicable.   | Narcotic effects |
| 2,3-dimethylpentane                     | Category 3 | Not applicable.   | Narcotic effects |

Specific target organ toxicity (repeated exposure)

Not available.

#### **Aspiration hazard**

# Section 11. Toxicological information

| Name                                    | Result                         |
|---|--------------------------------|
| Naphtha (petroleum), hydrotreated light | ASPIRATION HAZARD - Category 1 |
| heptane                                 | ASPIRATION HAZARD - Category 1 |
| 3-Methylhexane                          | ASPIRATION HAZARD - Category 1 |

### Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any federal, state and regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
